2013 Spring Newsletter

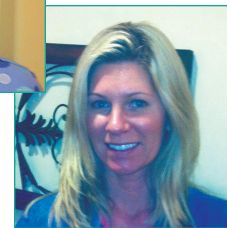

*We hope this letter finds you in good health and fine spirits.
Your care and comfort are always our main concern.*

Introducing our New Staff

- Alexa, our new hygienist who graduated at the head of her 2012 class.
- Renee and Octavia, our new Dental and Hygiene Assistants.

We will be preparing for the addition of a second dentist, Vincent Colletti, in spring 2014. He will be graduating from Creighton University School of Dentistry, and following in his father's footsteps. Vincent is currently president of the Junior Dental Society, and directing the University free dental clinic. He is planning on spending his 6 week summer break in the Dominican Republic on a volunteer mission to serve people who do not have access to dental treatment. We are currently accepting new patients in anticipation of Vincent's arrival. If you have friends or family that are in need of dental care, please refer them to our office, and inform them of our care to share plan (\$89 new patient special).

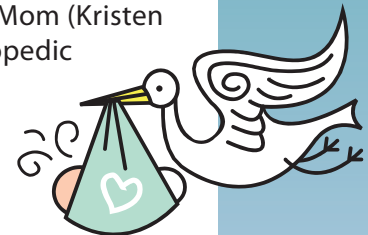

Newest Family Member

As of November 9, 2012 Dr. Colletti is the proud grandfather of Luke Colletti Myer. Mom (Kristen Colletti) and baby are happy and healthy. Dad (Dr. David Myer) is currently in orthopedic residency in Cincinnati Ohio; enjoying work and spending time with his new son.

Get Well Soon

Susie, Dr.'s assistant, was in a serious car accident last December. She is recuperating while taking her Dental Hygiene classes.

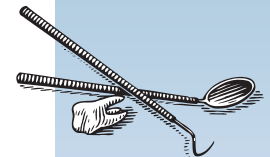

Welcome Back Special

Spring is approaching and we would like everyone to be up to date with their 6 month cleanings and exams. If you have not been in for a few years, call the office and we will gladly assist to regain your oral health (you may qualify for an additional incentive).

Dental Work

- Orthodontics are performed on adults as well as children. The results are remarkable; the benefits are both cosmetic and beneficial for your oral health.
- Bonding is another option, which can achieve cosmetic results similar to braces, but without orthodontics.
- If you are experiencing periodontal/gum pain, discomfort, or bleeding, you may benefit from our new DNA saliva test. This identifies which pathogens are present providing a customized treatment plan to maintain your gum health. Treatment includes laser decontamination, eliminating pathogens.

Feel free to call our office anytime and set up an appointment. We continually strive to keep our patients in the best of dental health and make your experience here a pleasant one. Please let us know if we can improve that for you in any way. Feel free to contact us anytime with questions or concerns. Hope you have a wonderful spring.
